We are very grateful to P3G and OECI-TuBaFrost for providing their questionnaires and for the support in adapting them to the needs of BBMRI. Furthermore we thank P3G for collecting and providing the information for the population based biobanks together with the WP2 of BBMRI. The work was funded in part by the FP7 BBMRI Grant Agreement 212111. The work leading to these results has also received funding from the European Community's seventh Framework programme (FP7/2007-2013) under grant agreement n°200754, -the GEN2PHEN project. Finally, we thank all biobanks which contributed to the catalogue by completing the BBMRI questionnaires (\*acronym was assigned by the BBMRI catalogue working group):
